Re: Notice of Ex Parte Presentation

**WT Docket No. 02-55; ET Docket Nos. 00-258, 95-18;
New DBSD Satellite Services G.P., Debtor-in-Possession, Applications for
Transfer of Control of Earth Station Licenses and Authorizations, File
Nos. SES-T/C-20091211-01575, SES-T/C-20091211-1576, SAT-T/C-
0091211-00144.**

Dear Ms. Dortch:

Yesterday, July 26, 2010, representatives of Sprint Nextel Corporation (Sprint Nextel) and its outside counsel met with Commission staff regarding the above-captioned proceedings. In attendance were Lawrence Krevor and Trey Hanbury of Sprint Nextel; Marc Martin, John Culver, and Felton Parrish of K&L Gates LLP, and Buck Logan of Lawler, Metzger, Keeney & Logan, LLC; Austin Schlick, Stewart Block, David Horowitz, Andrea Kearney, Sally Stone, and Julie Veach of the Office of General Counsel; Gardner Foster and Karl Kensinger of the International Bureau; and Geraldine Matise of the Office of Engineering and Technology.

Sprint Nextel representatives distributed copies of the attached presentation and recounted the history of the 2 GHz Mobile Satellite Service (MSS) licensing process. Sprint Nextel addressed a number of arguments made by ICO Global Communications (Holdings) Limited (ICO Global) in its July 19, 2010 Notice of Ex Parte Presentation and other filings in the above-captioned proceedings. These include false allegations that Sprint Nextel purposefully delayed the Broadcast Auxiliary Service (BAS) relocation and that re-affirming ICO Global 's longstanding obligation to reimburse Sprint Nextel a portion of the cost associated with clearing the MSS spectrum somehow amounts to a windfall for Sprint Nextel.

Ms. Marlene H. Dortch
 July 27, 2010
 Page 2

Sprint Nextel explained that, as the Commission repeatedly held when extending BAS deadlines, the causes of delay in the BAS relocation were beyond the control of Sprint Nextel (and any other entity), and that Sprint Nextel had every incentive, financial and otherwise, to complete the BAS relocation as quickly as possible.¹ Sprint Nextel undertook the BAS relocation on the reasonable expectation, based on Commission directives, of complete and timely reimbursement by the MSS operators for their *pro rata* share of Sprint Nextel's band clearance costs.² To date, Sprint Nextel has relied to its detriment on the reasonable expectation that the MSS operators would comply with the Commission's well established *Emerging Technologies* doctrine.³ Sprint Nextel's reasonable expectation of ICO Global's compliance with well-established FCC rules, decisions and policies hardly constitutes a windfall for Sprint Nextel.

¹ See e.g., *Improving Public Safety Communications in the 800 MHz Band, et al*, 25 FCC Rcd 1294, 1296 ¶ 4 (2010) ([t]wo themes have emerged throughout the BAS relocation process: the transition has proven to be far more complicated than was first anticipated, and Sprint Nextel has made continued progress in its efforts to relocate the BAS markets.).

² See e.g., *Improving Public Safety Communications in the 800 MHz Band, et al*, Report and Order and Order and Further Notice of Proposed Rulemaking, 24 FCC Rcd 7904, 7909, ¶ 11 (2009) (*Report and Order and Further Notice*) (When Sprint Nextel undertook its commitment to relocate the BAS licensees, the Commission did not remove either the obligation previously placed on the MSS entrants to relocate the BAS licensees, or the procedures that had already been put in place for doing so.); *Improving Public Safety Communications in the 800 MHz Band, et al*, Report and Order, Fifth Report and Order, Fourth Memorandum and Order, and Order, 19 FCC Rcd 14969, ¶ 261 (2004), *as amended* by Erratum, WT Docket No. 02-55 (rel. Sept. 10, 2004); Second Erratum, 19 FCC Rcd 19651 (2004); *accord* *Improving Public Safety Communications in the 800 MHz Band, et al*, Memorandum Opinion and Order, 20 FCC Rcd. 16015, ¶ 11 (2005) (Nextel, as the first entrant, is entitled to seek pro rata reimbursement or eligible clearing costs from subsequent entrants, including MSS licensees.).

³ See *Redevelopment of Spectrum to Encourage Innovation in the Use of New Telecommunications Technologies*, ET Docket No. 92-9, First Report and Order and Third Notice of Proposed Rule Making, 7 FCC Rcd 6886 (Oct. 16, 1992); Second Report and Order, 8 FCC Rcd 6495 (Aug. 13, 1993); Third Report and Order and Memorandum Opinion and Order, 8 FCC Rcd 6589 (Aug. 13, 1993); Memorandum Opinion and Order, 9 FCC Rcd 1943 (Mar. 31, 1994); Second Memorandum Opinion and Order, 9 FCC Rcd 7797 (Dec. 2, 1994); *aff'd* *Ass'n of Pub. Safety Comm'n Officials-Int'l, Inc. v. FCC*, 76 F.3d 395 (D.C. Cir. 1996).

Ms. Marlene H. Dortch
 July 27, 2010
 Page 3

Sprint Nextel also explained that the doctrine of issue preclusion—which generally bars successive litigation of an issue of fact or law actually litigated and resolved in a valid court determination essential to the prior judgment—cannot prevent the Commission from interpreting the Communications Act of 1934 (the Act), and its rules and policies adopted thereunder, in a rulemaking proceeding in its discretion as the expert agency, as Congress empowered it to do. Sprint Nextel discussed applicable Supreme Court and other case law supporting the principle that federal agencies may adopt interpretative rules arising under their organic statutes at variance with prior interpretations of the same issue by federal courts.

For example, in *Brand X*, the Supreme Court held that the Commission was not bound by the 9th Circuit's own prior interpretation of the Act, and that finding otherwise would impermissibly allow[] judicial precedent to foreclose an agency from interpreting an ambiguous statute, and that a contrary rule would produce hazardous results and lead to the ossification of large portions of our statutory law.⁴ Because the Bankruptcy Court implicitly acknowledged ambiguities in the Orders,⁵ the Commission is not bound by the Court's interpretation and may interpret such ambiguities in a manner the Commission believes correctly reflects its own interpretation as the expert agency.

In light of this interpretive authority, Sprint Nextel reiterated its request that the Commission affirm the direct (*i.e.*, joint and several) reimbursement responsibility of corporate entities that constitute a single MSS system through the above-captioned rulemaking proceedings prior to taking action on the above-captioned DBSD transfer of control applications.⁶ Deciding the DBSD transfer of control applications first, without the

⁴ *Nat'l Cable & Telecomm. Ass'n v. Brand X Internet Services*, 545 U.S. 967, 982-83 (2005) (*Brand X*) (quotations omitted). *See also Levy v. Sterling*, 544 F.3d 493 (3rd Cir. 2008); *Nat'l Org. of Veterans Advocates, Inc. v. Sec. of Vet. Affairs*, 260 F.3d 1365 (Fed. Cir. 2001).

⁵ *See Bench Decision on Debtors' Objection to Proofs of Claim Filed by Sprint Nextel Corporation*, at pp. 6-7, Case No. 09-13061 (Bankr. S.D.N.Y., Sept. 30, 2009) (recognizing that the Commission's prior orders did not expressly define what entrants means, which left open for interpretation the issue of whether entrants means only the licensees or each individual entity involved in satellite operations).

⁶ *See Report and Order and Further Notice*, 24 FCC Rcd at 7937-38, ¶ 87. This request was first made by Sprint Nextel in the reply comments it filed on July 24, 2009 in this rulemaking (the Reply Comments). Applying joint and several liability to all MSS operators through the rulemaking proceeding properly keeps the focus on the full and

Ms. Marlene H. Dortch
July 27, 2010
Page 4

benefit of the Commission's interpretive rulemaking, might result in one MSS operator being treated differently than another. The Commission can avoid issues of confusion, uncertainty and disparate treatment by acting consistently with well established decisions and practice to first affirm the joint and several reimbursement responsibilities of each entity that is a part of an MSS system, operation, or enterprise.⁷

Sprint Nextel further discussed issues consistent with its filings in the above-captioned proceedings,⁸ including that any Commission affirmation of joint and several reimbursement responsibility would not constitute an impermissible retroactive rulemaking, and would not upset any settled expectations. Sprint Nextel noted that the Commission has broad discretion pursuant to provisions of the Act, such as Sections 303, 309(j), 310(b) and 310(d), to look through the corporate form of a licensee to find a party other than the actual licensee directly liable for compliance with the Commission's Rules and policies.

Sprint Nextel referred to its Reply Comments for a discussion of case law demonstrating that the proposals before the Commission in the rulemaking proceeding would not constitute impermissible retroactive rulemaking. Sprint Nextel noted that the discussion in the Reply Comments applies with equal force to any Commission interpretation in the subject rulemaking regarding the Commission's authority to look through the corporate form of an MSS licensee and find its corporate parent directly liable for the MSS operators *pro rata* share of the relocation costs pursuant to the Commission's authority under the Act and decades of related Commission and case law precedents.

Finally, Sprint Nextel pointed out that the Commission has already rejected the ICO Global and TerreStar argument that their reimbursement obligations expired on June 26, 2008, the original benchmark for completing 800 MHz band reconfiguration. In its 2009 *Report and Order and Further Notice*, the Commission stated that such arguments ignore the stated purposes and structure of the cost-sharing principles set forth in the 800 MHz

complete reimbursement of Sprint Nextel's band clearance costs, by ensuring that Sprint Nextel will be able to obtain full reimbursement from the collective group of MSS operators.

⁷ Deferring the decision on the DBSD applications until the appeal of the Bankruptcy Court decision in the 2nd Circuit is completed also ensures that the Commission conserves its resources and acts at a procedurally appropriate time.

⁸ See, e.g., *Improving Public Safety Communications in the 800 MHz Band, et al*, WT Docket No. 02-55, Comments of Sprint Nextel Corporation (July 14, 2009); Reply Comments; Opposition of Sprint Nextel Corporation to the Petition for Stay Filed by New DBSD Satellite Services G.P. (July 24, 2009).

Ms. Marlene H. Dortch

Page 5

R&O and other decisions regarding the shared responsibilities of new entrants for BAS relocation.⁹ The Commission further found that:

Nothing in the text of the relevant orders suggests that the Commission limited the time in which Sprint Nextel could seek reimbursements from MSS entrants to provide an independent benefit to MSS entrants, *e.g.*, to subsidize them or provide them certainty about their business costs. Thus, *we find that the MSS entrants' cost sharing obligations must be interpreted in light of the unanticipated changed circumstances, and these obligations should not be tied to a deadline that is no longer relevant.* In short, MSS entrants should pay a *pro rata* share of the BAS relocation costs unless doing so would allow Sprint Nextel to be reimbursed twice (by both the Treasury and the MSS and AWS-2 licensees).¹⁰

Pursuant to Section 1.1206 of the Commission's Rules, a copy of this letter is being filed electronically in the above-referenced dockets and electronic copies are being submitted to Commission staff listed below.¹¹ If you have any questions, please feel free to contact me at (202) 778-9859.

Sincerely,

/s/ Marc S. Martin

⁹ *Report and Order and Further Notice*, 24 FCC Rcd at 7935, ¶ 77.

¹⁰ *Id.*, 24 FCC Rcd at 7935-36, ¶ 80 (emphasis added). Although the *Report and Order and Further Notice* sought comment on a number of issues for implementing MSS licensee reimbursement obligations in light of the unanticipated changed circumstances, it dispelled, once and for all, any notion that the original June 26, 2008 benchmark has any relevance to those obligations.

¹¹ Sprint Nextel will, under separate cover, expeditiously provide the Commission with the results of some additional research.

Chronology of MSS Licensee Reimbursement Obligation

The following is a chronology of key FCC decisions and developments related to the obligation of TerreStar Networks Inc. (TerreStar) and ICO Global Communications (Holdings) Limited (ICO) to reimburse Sprint Nextel Corporation (Sprint Nextel) for their *pro rata* share of the cost of clearing Broadcast Auxiliary Service (BAS) licenses from the 1990-2025 MHz band.

One Consistent, Overarching Principle Throughout This Chronology

TerreStar and ICO's reimbursement obligation derives from a principle that has remained consistent throughout the time period covered by this chronology, and which has been emphasized by both the FCC and the federal courts:

“A guiding principle for relocation is that those entrants that benefit from cleared spectrum have an obligation to shoulder their portion of the costs to relocate incumbent operations. We fully intend to apply that principle [to TerreStar and ICO].” (FCC 2009 Order and Further¹)

“From a non-legal, just a very simple, old-fashioned approach, putting aside all the requirements and technicalities of the law, if Sprint has paid out hundreds of millions of dollars to clear this bandwidth from which the two defendants will ultimately . . . benefit and if the basic principle within the FCC is that there is a concept of fair reimbursement when subsequent licensees first enter into bandwidth that somebody else has cleared for them, then just from a basic what's fair and what's right standpoint, there ought to be some way of coming to some practical resolution.” (U.S. District Judge Leonie M. Brinkema, U.S. District Court for the Eastern District of Virginia, Aug. 29, 2008²)

1990s to Present: Cost Sharing Established and Consistently Applied

In its *Emerging Technologies* proceedings in the 1990s, the FCC establishes the “cost sharing principle that the licensees that ultimately benefit from the spectrum cleared by the first entrant shall bear the cost of reimbursing the first entrant for that benefit.”³ The FCC consistently applies this principle to every incumbent relocation, including the clearing of the PCS and AWS-1 bands. The FCC also applies traditional cost-sharing principles to the BAS relocation.⁴

March 14, 1997: MSS Allocation and BAS Relocation Responsibility

The FCC adopts Mobile Satellite Service (MSS) allocation for the United States and requires that BAS be relocated. The FCC states that the “cost of all steps necessary for clearing the 1990-2025 MHz band for MSS operators will be borne by MSS operators.”⁵

1998-2000: FCC Imposes BAS Relocation and Reimbursement Obligations on MSS Licensees

On November 25, 1998, the FCC affirms the MSS allocation and seeks comment on proposed rules to require MSS to relocate BAS facilities consistent with the FCC’s *Emerging Technologies* policies, under which every operator in the band shares spectrum clearing costs on a *pro rata* basis.⁶ On July 3, 2000, the FCC establishes the 2 GHz MSS licensee obligation to relocate BAS and also establishes the requirement that new entrants share the cost of relocating BAS incumbents.⁷

In these proceedings, ICO states that requiring the first new entrant to pay “full relocation costs without any reimbursement from later entering MSS providers” would “unfairly punish ” the first new entrant.⁸ Similarly, TerreStar’s predecessor, TMI, states that “equity requires” that entities that benefit from the clearing of BAS licensees “should . . . share in the financial burdens of the relocation of [these] licensees.”⁹

July 17, 2001: ICO and TerreStar Obtain MSS Authorizations Conditioned on BAS Relocation and Reimbursement Obligations

The FCC authorizes ICO and TerreStar to construct, launch and operate MSS systems on the condition that they comply with BAS relocation and cost-sharing obligations.¹⁰

July 2001 to Present: ICO and TerreStar Take No Steps to Relocate BAS Incumbents

In 2002, the broadcast industry reports that, well into the MSS– BAS mandatory negotiation period, “there have been no substantive relocation negotiations undertaken by any MSS licensee.”¹¹

In subsequent years, the FCC twice finds “no evidence that any meaningful relocation negotiations” took place between MSS and BAS licensees.¹²

August 6, 2004: FCC Adopts Sprint Nextel – BAS Relocation Plan While Reiterating MSS Relocation and Reimbursement Obligations

The FCC adopts its *800 MHz Order*, including a joint Sprint Nextel – broadcast industry plan to relocate BAS licensees. The order makes clear that ICO and TerreStar have a continuing, independent obligation to relocate BAS licenses. The order also establishes that, to the extent Sprint Nextel takes the lead in the relocation, it is entitled to seek reimbursement from MSS licensees entering the band prior to the conclusion of 800 MHz reconfiguration for their *pro rata* share of the cost of relocating fixed and mobile BAS in the Top 30 markets and all fixed links in all markets.¹³

August 2004 to Present – Sprint Nextel Works Diligently with Broadcasters to Relocate BAS Licensees – With No Help From ICO and TerreStar

Following the *800 MHz Order*, Sprint Nextel works closely with the broadcast industry to relocate approximately 1000 BAS incumbents to the new 2 GHz band plan without disrupting broadcaster news operations. Sprint Nextel dedicates enormous resources to the task, with dozens of Sprint Nextel employees and hundreds of outside vendors working on outreach, the equipment inventory process, negotiating relocation agreements, the purchase order process, the installation of new BAS equipment, change orders, and a myriad of other complex tasks and challenges. Scores of broadcaster station employees also work in good faith in tackling these challenges.

Throughout this time, ICO and TerreStar decline to assist the relocation process in any fashion, notwithstanding their independent obligation to relocate BAS licensees. For example, in the fall of 2007, Sprint Nextel invite ICO and TerreStar to participate in the relocation process by providing their own negotiators, lawyers, and engineers within the existing BAS relocation structure developed by Sprint Nextel, but ICO and TerreStar decline.

In July 2009, the broadcast industry states:

All of [the] progress [broadcasters and Sprint Nextel have made] has occurred in the face of the ongoing refusal of the two MSS entrants, TerreStar and ICO, to make *any* contribution – whether in the form of labor, planning, technical expertise, or financial reimbursement – to the BAS relocation. As far as the BAS relocation is concerned, TerreStar’s and ICO’s sole involvement has been to file comments and make *ex parte* presentations . . . in which they have lobbied the Commission repeatedly for rule changes that would excuse them from paying their fair share of BAS relocation costs prior to commencing operations.¹⁴

Oct. 5, 2005: FCC Reaffirms MSS Cost-Sharing and Relocation Obligations

In an order released on October 5, 2005, the FCC reiterates that, “[u]nder the equitable reimbursement calculus, Nextel, as the first entrant, is entitled to seek *pro rata* reimbursement of eligible clearing costs from subsequent entrants, including MSS licensees.”¹⁵ The FCC also states that “MSS licensees retain the option of accelerating the clearing of [the top 30 markets] so that they could begin operations before Nextel has completed nationwide clearing.”¹⁶

March 7, 2006: Sprint Nextel Seeks Reimbursement from ICO and TerreStar

Consistent with the terms of the *800 MHz Order*, Sprint Nextel notifies the FCC, ICO, and TerreStar of its intention to seek reimbursement from the MSS licensees for their share of the BAS relocation costs.¹⁷

November 27, 2007: Sprint Nextel Agrees to Accommodate MSS Market-Prioritization Requests

At the insistence of ICO and TerreStar, Sprint Nextel agrees to accelerate the transition of 25 markets because MSS licensees identified these areas as high priorities for MSS operations. As agreed, Sprint Nextel completes the transition in these markets by no later than the summer of 2008. Accommodating these requests diverts resources from other markets and disrupts the most efficient allocation of band-clearing efforts, delaying the overall completion of BAS relocation. Accommodating the MSS licensee requests ultimately is all for naught, however, as ICO and TerreStar subsequently delay commencing their commercial operations.

February 4, 2008: FCC Reiterates ICO and TerreStar Relocation Obligations

In a February 4, 2008 order, the FCC reiterates that both “Sprint Nextel and 2 GHz MSS licensees have equal obligations to relocate the 1.9 GHz BAS incumbents.”¹⁸

May 9, 2008: ICO MSS System Becomes Fully Operational

ICO certifies that its MSS system is fully operational on May 9, 2008.¹⁹ ICO consequently incurs its reimbursement obligation to Sprint Nextel on that date under the tentative conclusion set forth in the Commission’s *2009 Order and Further Notice*.²⁰

June 25, 2008: Sprint Nextel Files Suit

Sprint Nextel files suit in U.S. District Court for the Eastern District of Virginia against ICO and TerreStar to enforce the *800 MHz Order* and to recover from ICO and TerreStar a *pro rata* share of Sprint Nextel's BAS relocation costs

August 29, 2008: Court Refers Issue to FCC and Notes Equities in Favor of Sprint Nextel

U.S. District Judge Leonie M. Brinkema denies ICO's and TerreStar's motions to dismiss Sprint Nextel's lawsuit, but refers the case back to the FCC for further resolution. Judge Brinkema notes the equities in favor of "fair reimbursement" for Sprint Nextel (see quote on page 1).

June 12, 2009: FCC Reaffirms ICO and TerreStar Obligation to Reimburse Sprint Nextel and Seeks Comment on Implementation Issues

The FCC releases its *2009 Order and Further Notice*, making the following findings:

- "Successful completion of [BAS relocation] does not rest with any one party but requires the cooperation of the incumbents and all new entrants, acting in good faith, to assume responsibility for the relocation process so that all may benefit."²¹
- "When the decision was made to permit Sprint Nextel to use the 1990-1995 MHz band, no BAS licensees had yet been relocated and there was no evidence that any meaningful relocation negotiations had taken place between BAS licensees and MSS entrants. ... Sprint Nextel remains the sole entity actively undertaking [BAS] relocations."²²
- "Sprint Nextel has made considerable progress in the BAS relocation process that has proven to be a more complex undertaking than any party may have initially anticipated."²³
- The FCC rejects MSS licensee arguments that their reimbursement obligations arbitrarily terminated on June 26, 2008 (the originally anticipated benchmark for completing 800 MHz reconfiguration), stating such arguments ignore "the stated purposes and structure of the cost-sharing principles set forth in the *800 MHz R&O* and other decisions regarding the shared responsibilities of new entrants for BAS relocation."²⁴
- "Nothing in the text of the relevant orders suggests that the Commission limited the time in which Sprint Nextel could seek reimbursements from MSS entrants to provide an independent benefit to MSS entrants, *e.g.*, to subsidize them or provide them certainty about their business costs. Thus, we find that the MSS entrants'

cost sharing obligations must be interpreted in light of the unanticipated changed circumstances, and these obligations should not be tied to a deadline that is no longer relevant. In short, MSS entrants should pay a *pro rata* share of the BAS relocation costs unless doing so would allow Sprint Nextel to be reimbursed twice (by both the Treasury and the MSS and AWS-2 licensees).”²⁵

The *2009 Order and Further Notice* makes clear the Commission’s intent to enforce ICO and TerreStar’s cost-sharing obligations, and seeks comment on the specific procedures and requirements for implementing these obligations. The FCC tentatively concludes that “an MSS entrant will have entered the band and incurred a cost-sharing obligation when it certifies that its satellite is operational for purposes of meeting its operational milestone.”²⁶

The *Further Notice*’s comment cycle closes in July 2009.

July 20, 2009: TerreStar Certifies Compliance with Operational Milestone

On August 30, 2009, TerreStar certifies that its satellite had become operational and thus incurs its reimbursement obligation to Sprint Nextel under the FCC’s tentative conclusion in the *2009 Order and Further Notice*.²⁷

July 2010: Sprint Nextel and Broadcasters Complete the BAS Relocation

Sprint Nextel and the broadcast industry relocate the last market (Anchorage) in July 2010, completing the BAS relocation throughout the country without disruption to broadcaster news operations. Overall, the process involved relocating about 1000 BAS licensees and replacing approximately 100,000 pieces of television transmission equipment. Sprint Nextel and the broadcast industry overcame numerous complexities and challenges to complete the relocation, including complex tax considerations, natural disasters and severe weather, and limited BAS equipment production lines. Although the relocation took longer than initially anticipated, the FCC issued orders extending the relocation deadline, finding “compelling” reasons for the extension and that Sprint Nextel had acted in good faith and taken all steps within its control to meet the FCC’s deadlines.²⁸

Sprint Nextel ends up spending approximately \$750 million to complete the BAS relocation.

As a result of Sprint Nextel’s efforts, 35 megahertz of spectrum in the 1990-2025 MHz band is now clear for new services. Sprint Nextel has been assigned 5 megahertz – 15% of the total cleared spectrum – while ICO and TerreStar have been assigned 20 MHz – or 57% of the total cleared spectrum. The remaining 10 megahertz – 28% of the total – is allocated to AWS. The following chart depicts the respective allocations.

*AWS = Advanced Wireless
